

airCloud Tap

Minimise commissioning and maintenance time with NFC technology

Developed with HVAC professionals in mind, the airCloud Tap app uses your smartphone to read, write and upload settings for faster setup of Hitachi air conditioning systems.

Simply place your smartphone near a compatible Hitachi room controller, then view, edit and transfer settings instantly using near field communication (NFC) technology.

Faster than using a room controller

- ✓ Optimised user experience
- ✓ Faster to navigate settings and enter data
- ✓ Copy & transfer settings to multiple controllers from your phone or tablet; ideal for multi-room setups

No need to install additional hardware

- ✓ Works with the latest Hitachi room controllers
- ✓ NFC chip already embedded in compatible Hitachi AC equipment

Convenience of a mobile app

- ✓ Easily browse all settings by scrolling on your phone
- ✓ Access to more than 140 settings & features
- ✓ Complete descriptions of each setting mean you don't need to consult extra documentation
- ✓ Phone does not need to be connected to internet to read and write data

*airCloud Tap is compatible with selected Hitachi Cooling & Heating products.

airCloud Tap – Settings highlights

*airCloud Tap is compatible with selected Hitachi Cooling & Heating products.

Date & time setting
Import date and time settings from your mobile phone directly into the controller.

Installation & service function selection
Browse over 140 features and their descriptions to optimize settings for the needs of individual rooms.

Temperature range restrictions
Apply min-max temperature ranges to prevent excessive cooling and heating.

Scheduling
View and set intuitive weekly schedules to enable better decision-making.

Troubleshooting
Complete service check data is displayed including connected indoor and outdoor units, refrigeration cycle information, sensor data, and more.

Error alarm & history
Error alarm codes and their descriptions are displayed on the app. Error histories can be forwarded to support the servicing of controllers.

How does airCloud Tap work?

1 Activate the NFC function on your AC equipment.

2 Open the airCloud Tap app and tap the AC equipment with your phone to create a connection.

3 Edit the desired settings on your phone. **You don't need to stay close to the AC while editing.**

4 Tap again to apply the new settings.

Special tip: Save time on multi-room commissioning

Specify settings for one room, save them, then apply these settings to other similar rooms in one tap. **Particularly useful for multiple zones with similar needs;** hotel guestrooms, office meeting rooms, condominium units, etc.

Step 1: Edit & save
Read the settings from one device and save those settings on airCloud Tap.

Step 2: Tap & write
Hold the mobile device over each controller unit and write the settings saved in step 1.

Accessible to HVAC professionals*

airCloud Tap is available to download for free

Security is ensured with user registration and login

3 User roles available:

Facility Manager, Installer, Authorised Service

Languages available: English, Japanese, Portuguese, Spanish

Available on the App Store

ANDROID APP ON Google Play

* Available in selected countries
